

Groundbreaking Cloud Financial Management: Effortlessly Save up to **90%** with the Latest Innovation

GlobalDots, with over 20 years of experience in cloud innovation, now offers businesses exclusive access to bleeding-edge FinOps technologies & services.

Our mission is to help all organizations close knowledge gaps and manage their spend prudently. Whether you're a startup or an established enterprise, we'll customize our solutions to meet the unique needs of your IT architecture. We leverage our vast experience from **hundreds of successful use cases to ensure optimal results.**

Cost Saving Opportunities: aws Environment

No Architecture Changes

Seamless Deployment & Management

Complete Cost Visibility: Every Business Unit, 24/7

Accelerated TTV: Quick Wins with Immediate Savings

Transparent & Usable Data for Contextual Understanding

ROI-Positive, No-TCO: Pay Only for What You Save

Maximizing DevOps Efficiency: We Do the Heavy Lifting for You

All-Inclusive Cost Anomaly Coverage

1

Kubernetes: Run MORE Workloads Using LESS Resources

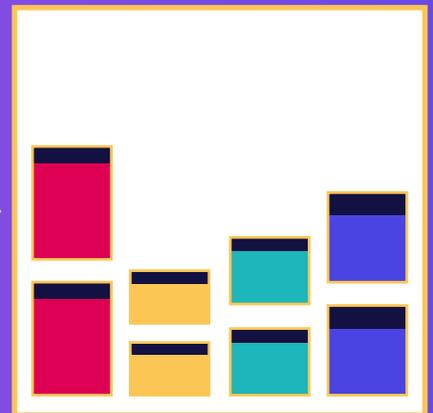

- Container Rightsizing ✓
- CPU & RAM Requirements: Changing by the Minute to Meet Demand ✓
- Bin Packing ✓
- HPA Optimization ✓
- Resource Prioritization ✓
- Streamlined K8s Resource Management ✓

Before

After

Cloud Waste - **\$164,000**

Poor Latency 📉

Repeated Configurations 🗑️

Cost - **\$31,560**

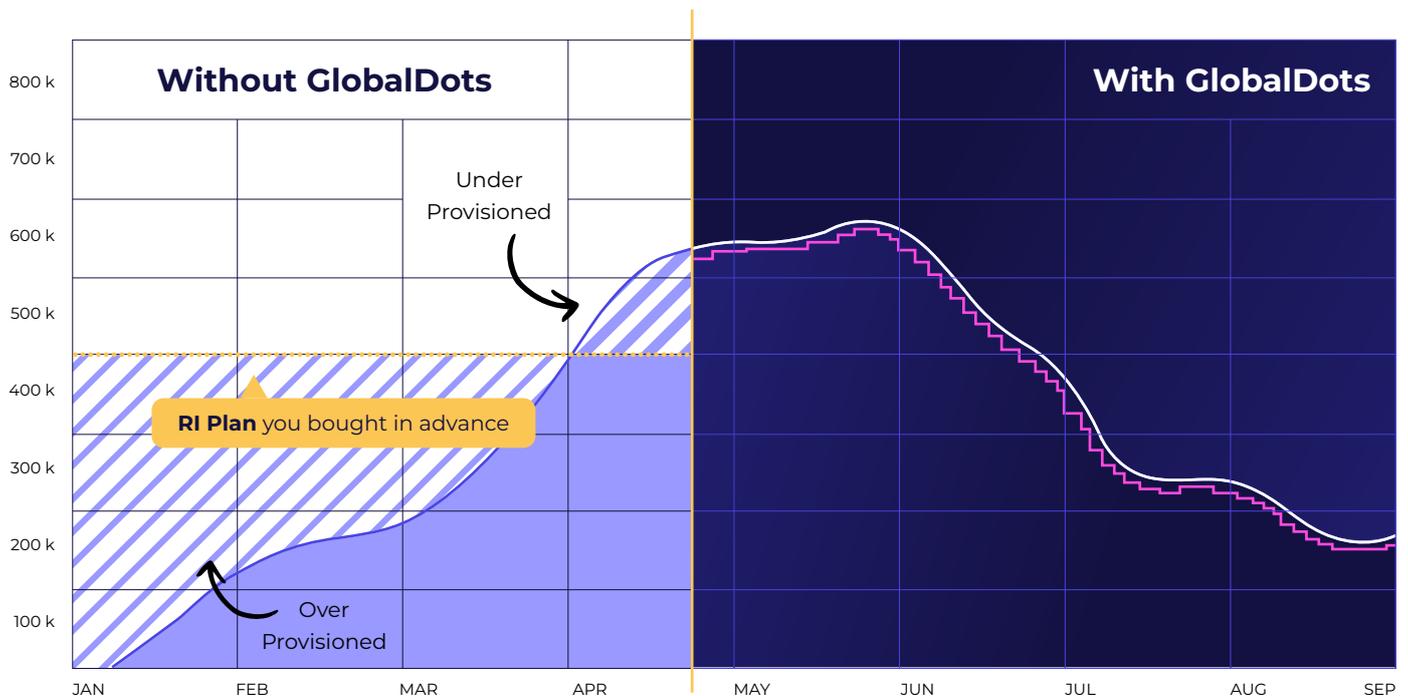

Good Latency 📈

Continuous Optimization

RI & SP Automation: Commitments Life-Cycle-Management

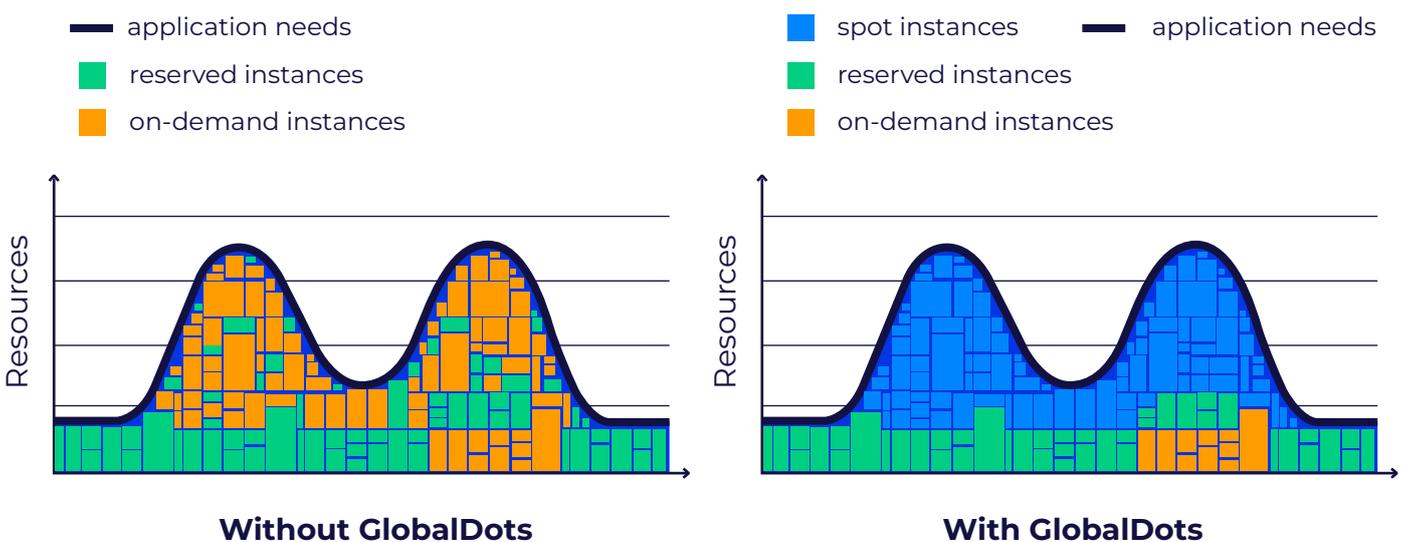

- Real-Time Selling & Purchasing of RIs ✓
- ML-Driven Selection & Predictive Rebalancing of Savings Plans & Reserved Instances ✓
- Reduce On-Demand Resources to Near 0% ✓
- Continuous Monitoring & Optimization ✓
- Buy-Back Guarantee ✓

Spot Instance: Full Orchestration

- Advanced Spot Instance Orchestration for Cloud Infrastructure ✓
- Available for K8s, ECS, Auto Scaling Group / VM Scale Sets & Stateful Instances ✓
- Hands-Free Cluster Provisioning and Node Scaling ✓
- Intelligent Provisions of the Most Cost-Efficient Mix of Compute Resource Types & Pricing ✓

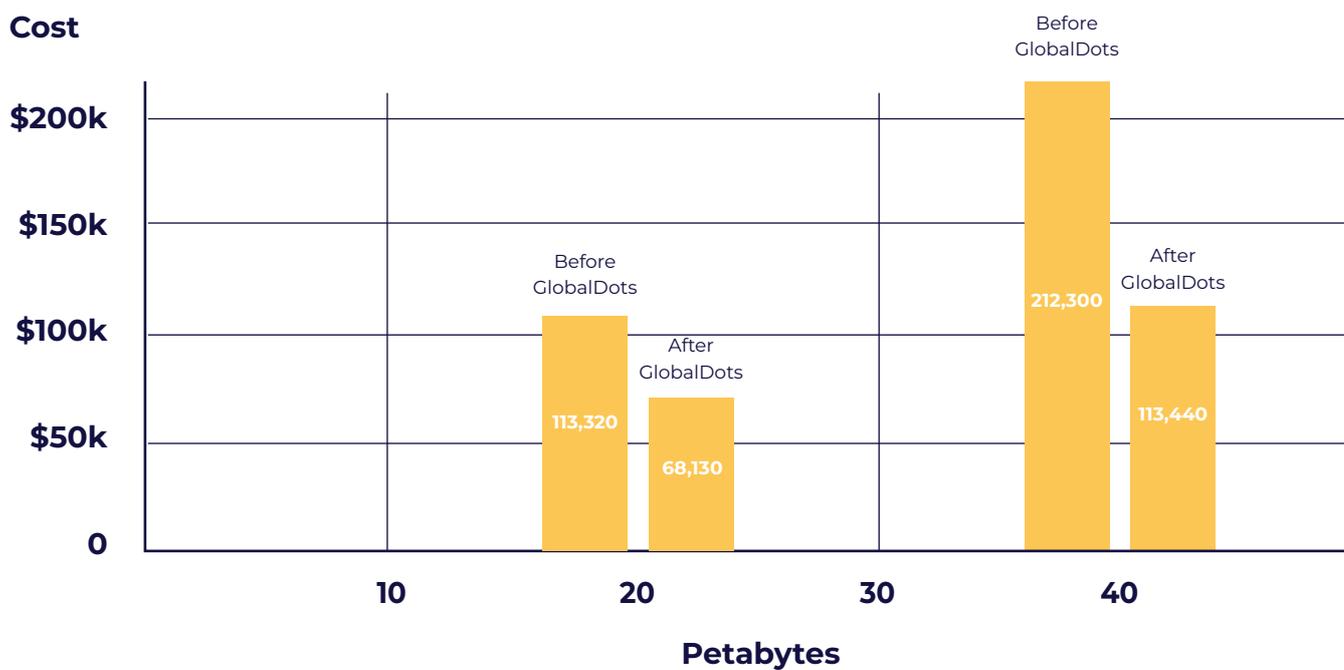

Object Storage: Archive Tier Pricing, Standard Tier Rewards

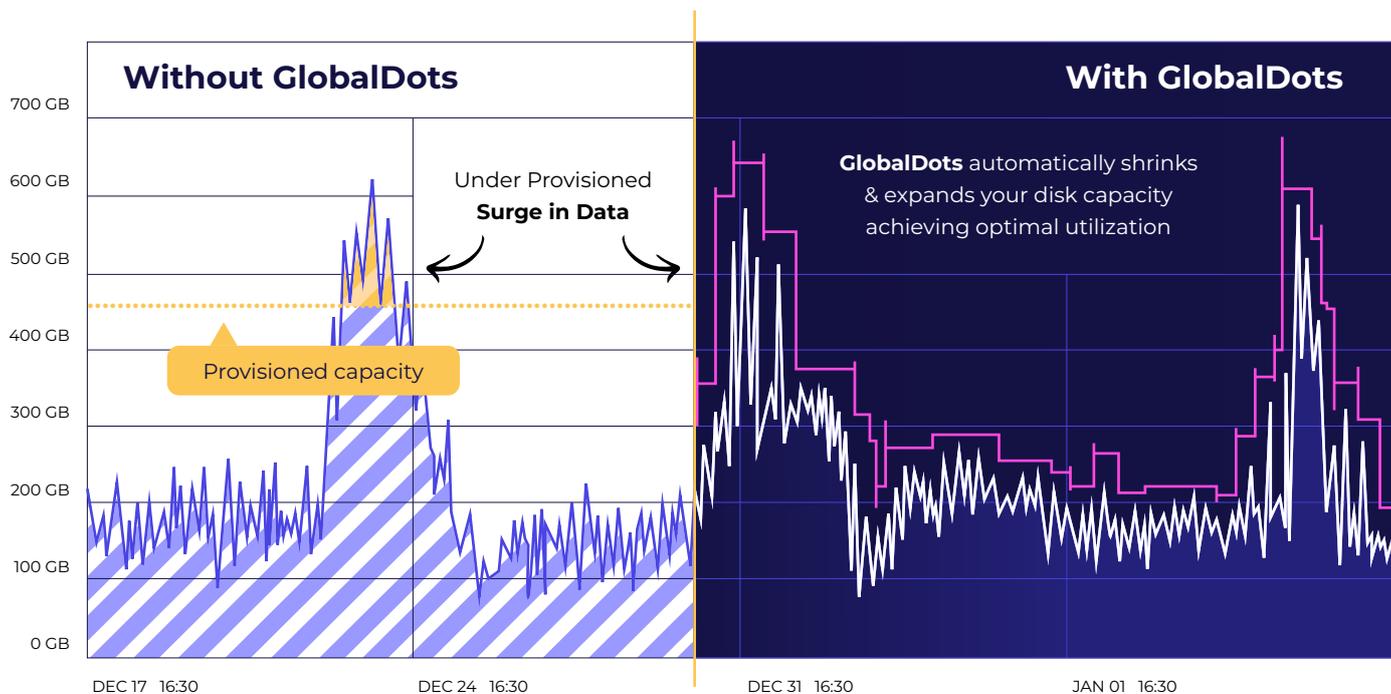

- Data Reduction for Petabyte Scale Cloud Object Storage ✓
- Retrieve Data Instantly without Paying Fees ✓
- Runs within YOUR VPC, Using YOUR Policies ✓
- Automatic Elastic Crunch Scaling ✓

Cost

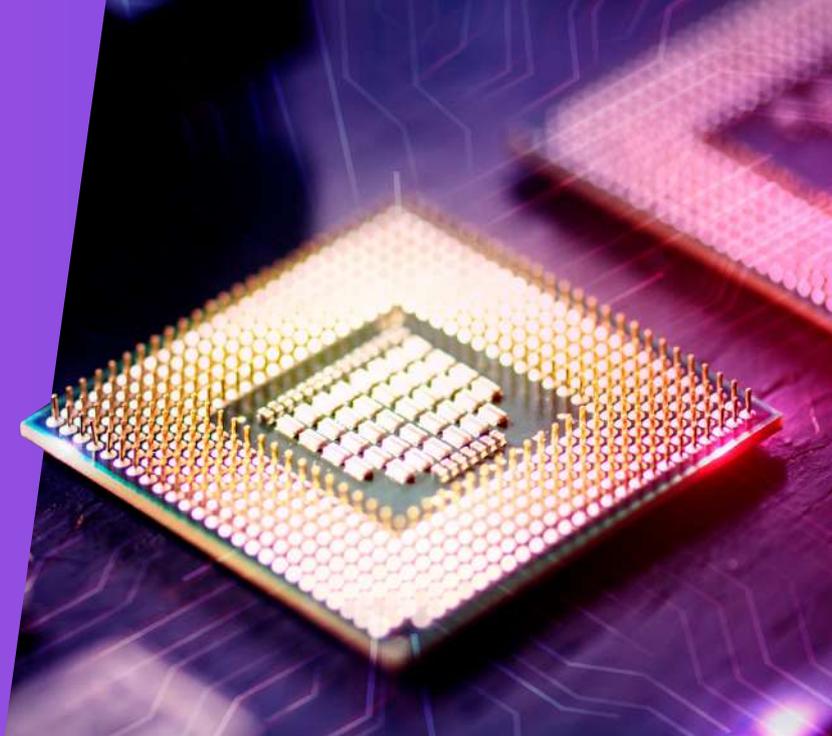

Block Storage: Pay for Disk Usage, Not for Allocation

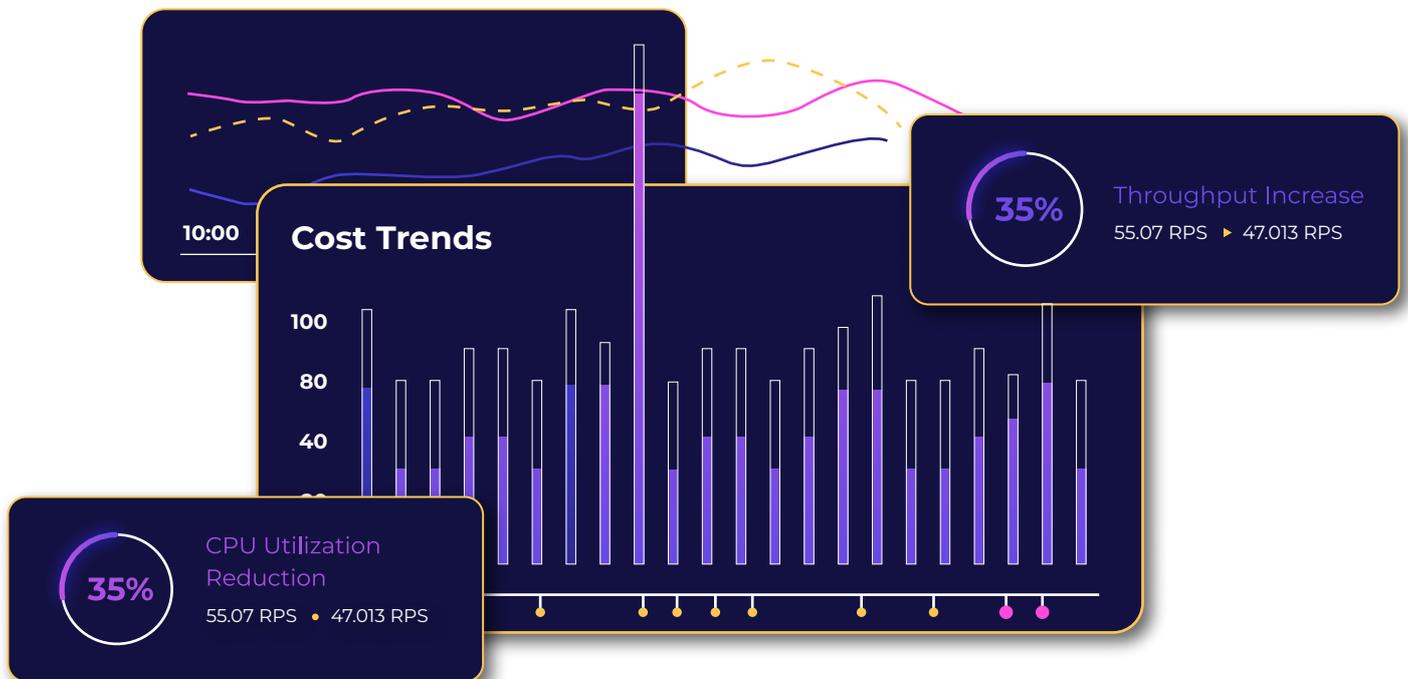

- Shrink & Expand in Runtime ✓
- Increase Disk Utilization from 35% to 80% ✓
- Eliminate Overprovisioning ✓
- Never Run out of Disk Space During a Surge ✓

CPU Workloads Real-Time Continuous Optimization

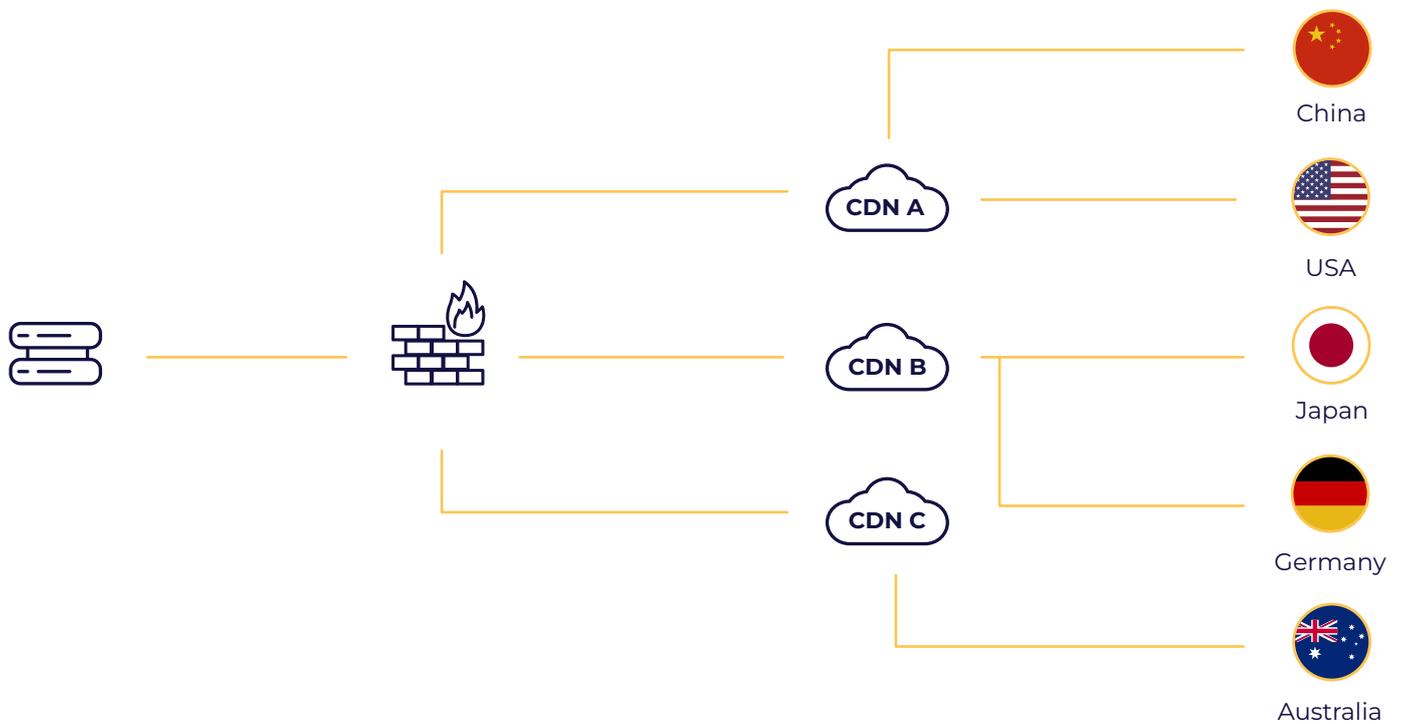

- CPU Utilization Reduction ✓
- Handles Workloads with 60% Fewer Servers ✓
- Increases Throughput 5X Per Server ✓
- Improves Application Performance ✓

Data Transfer Optimization: Leverage CDNs to Reduce Bandwidth Costs

- Multi-CDN Integration & Migration Support ✓
- Infinite Hyperscaling: We Stream More than 1 EB (1000 PB)/m ✓
- Removes Vendor Lock-In ✓
- Premium Partner of the Top-Rated Worldwide CDN players
- The MOST COMPETITIVE PRICES in the Market ✓

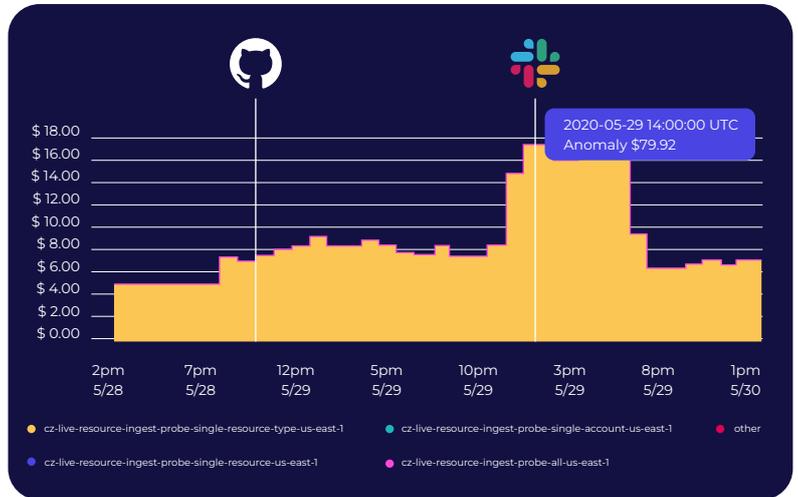

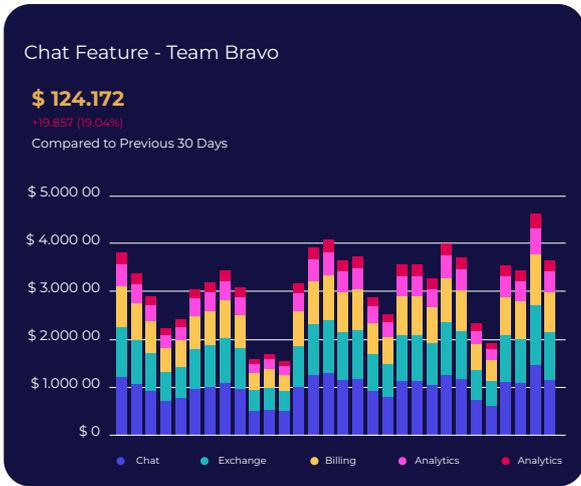

Cost Visibility & Tagging Automation: Cloud Bill Simplified, Context Amplified

- Allocate 100% of Your Spend & Correlate it with Business KPIs ✓
- Easy Discovery of New & Ongoing Optimization Opportunities ✓
- Measure & Control Unit Costs ✓
- Autonomous Anomaly Detection, Forecasting & Recommendations ✓
